

As a TAFE SA student you have access to most Australian standards via **Techstreet**.

NOTE: all users will be required to install **FileOpen** plugin in conjunction with **Adobe Acrobat**.

Installation options - <https://plugin.fileopen.com/all.aspx>

How can you tell if the File Open Plugin has been installed? Within **Adobe Acrobat Help > About Third-Party Plug-Ins >** and checking if **FileOpen** is listed.

Standards are protected by **FileOpen** which is Digital Rights Management (DRM) software to control or prevent digital copies from being shared over computer networks. Techstreet welcome page also includes links to assist with downloading DRM software

Digital Rights Management

Your subscription has DRM enabled for the following publishers: AAMI, AS, ASHRAE, BS, Document Repository, IEC, MIL, NSF, SAE
In order to view documents from these publishers you must install

FileOpen:

[Install Acrobat](#)

[Install FileOpen](#)

[Test FileOpen](#)

[FileOpen FAQ](#)

Due to the restriction's DRM put in place, you will not be able to email the Standard or put it on a USB. The downloaded PDF is device specific.

- You are required to register as an individual user to view or download standards from Techstreet Enterprise.
- A watermark with your TAFE SA email address will be inserted on every page of any standard you download.
- Reproduction, distribution, and storage or use on a network is prohibited.

The TAFE SA license agreement allows you to:

- download as many copies of a standard as you like, but only for personal study purposes.
- make **unlimited printouts** of a standard you downloaded for personal study purposes.
- make these printouts anywhere.

The TAFE SA license agreement does not allow you to make electronic copies or printouts for your friends, work colleague, or classmates.

To access Techstreet: via My TAFESA (previously Portal)

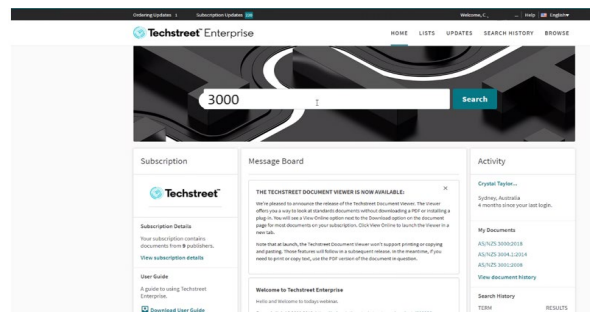

- Logon to MyTAFESA using your network sign-on <https://mytafesa.tafesa.edu.au/> Click on the **Library** link

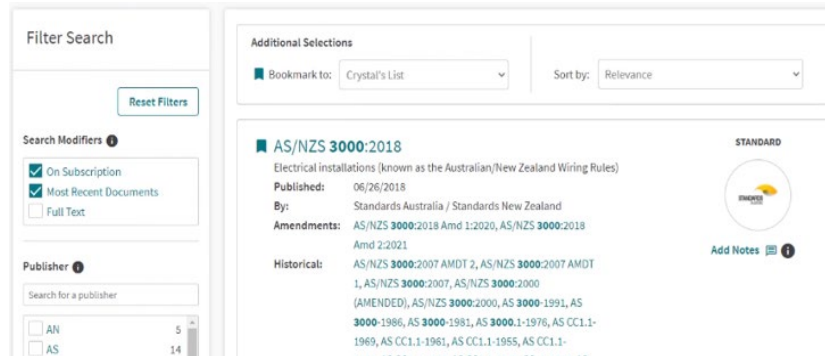

- Search 'techstreet' Select **Australian Standards (Techstreet) [Database]** from the listing.
 - Follow the instruction to 'signup' [signup page](#)
 - Register for a personal Techstreet account using **your TAFE SA email**.
- **Once registered with Techstreet**, you can then link direct via: <https://subscriptions.techstreet.com/>
- The license allows all users to search documents, but only limited users can view & download at any time.
 - You may have to wait until a user logs off.

To search:

- Use the search box. Search by **Standard Number**, e.g. 3000 etc. There is no need to add the AS or AS/NZS prefix. You may also enter the beginning part of the number and all the standards beginning with that part will be displayed.

- Update content via **Subscription Updates** on top banner
- You can search by **keyword**, e.g. *steel; welding; safety; hospitals; cooking*.
- You can search by **phrase**, e.g. *steel pipe; wiring rules; air quality; confined space*.
- The checkbox **On Subscription** limits the search to standards that are part of the library's subscription.

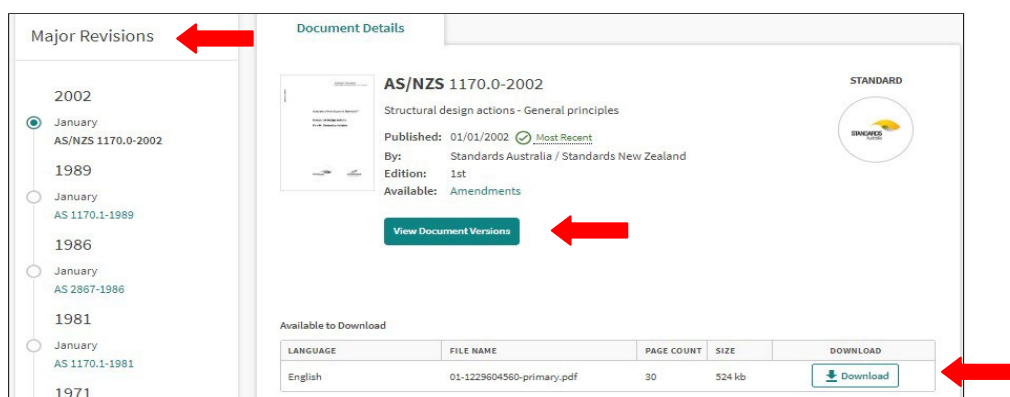

To view or download a standard:

From the Search Results page you can then select your standard. You can also see immediately the historical versions and amendment history of the standard.

From the standard page you will then:

- See an outline of **Major Revisions**, **View Document Versions** and can **Download** the standard. Once downloaded the standard is yours to keep as a PDF or you can print it.

You can also get a description of the standard in **About This Document** and view **Document Versions**.
