

How to use Google Scholar to find FREE scholarly articles

Google Scholar is:

- a subcategory of Google Web Search that enables you to find free scholarly articles that you can cite for TAFE essays and research assignments.
- a free academic search engine that enables you to search specifically scholarly literature and academic resources from reputable publishers

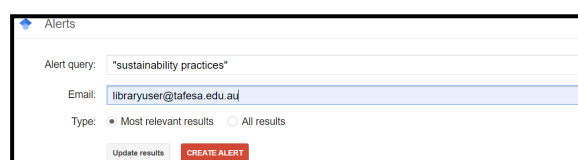

Keywords search on your topic:

- search results
- the author, journal title, year, and publisher are located underneath the title.
- it also shows you the abstract underneath that
- **PDF** or **HTML** link files would give you direct access to free articles here

Please **note** that search results are **sorted** automatically by:

- **Relevance** - an option is available to sort by **date**.
- **Cite** – it will generate a Reference list in different styles, select Harvard Style for TAFE
- **Review articles** – ONLY search for peer-reviewed articles
- **Envelope icon** – click to set up alerts for new results matching your search

- Refine results further with **Advanced search**
